Experience

2020-11 -

Current

Software Developer

Northwest Missouri State University, Maryville, MO

- Revised, modularized, and updated student census application, allowing chairs of departments to automatically generate excel reports and payment forms for more than 350 online instructors.
- Worked with a team of 10 developers to design and develop a faculty management application allowing chairs of departments to track and analyze online instructors' performance. Retrieved data from 3 different external APIs and displayed it in appropriate graphs.
- Designed intuitive graphical user interface for seating chart application allowing instructors to track student's position. It is used to support covid cases tracking across hundreds of in-person classes.

2020-01 -

2020-05

College Writing Tutor

Bethany College, Bethany, WV

- Crafted effective learning plans for 5 students to address their writing weaknesses and strengths.
- Provided individual tutoring sessions for more than 20 students struggling in composition writing.
- Assessed current reading levels and planned optimal educational strategies to help students improve writing skills.
